JUDIT LEHOCZKI

FULL STACK SOFTWARE DEVELOPER

I recently graduated from the Northcoders coding bootcamp.
I am a quick learner, experienced in working remotely while adopting agile practices such as pair-programming, scrum methods, test-driven and iterative development.
I am a proactive team player with a strong work ethic, keen to progress and always welcome a challenge.
My strong problem solving skills with excellent attention to detail come from my 12 years accountancy experience. I work well in fast-paced environments and under pressure.

I am now looking for new challenges at an organisation where personal development and career progression is a focus.

WORK EXPERIENCE

FULL STACK SOFTWARE DEVELOPER

Northcoders | Jan 2020 - Apr 2020
A 12-weeks coding bootcamp in Manchester.

HELPING HAND

Help the vulnerable by doing their shopping for them!
A full stack mobile application for both iOS and Android. Inspired by the coronavirus situation, people at higher risk can send in their shopping list and volunteers who live within the same area can pick them up and help out. My graduation project developed with two other coders 100% remotely due to the lockdown situation with agile practices.

Further details and demo presentation coming soon! (End of April.)
