JUDIT LEHOCZKI

FULL STACK SOFTWARE DEVELOPER

I recently graduated from the Northcoders coding bootcamp.
I am a quick learner, experienced in working remotely while adopting agile practices such as pair-programming, scrum methods, test-driven and iterative development.
I am a proactive team player with a strong work ethic, keen to progress and always welcome a challenge.
My strong problem solving skills with excellent attention to detail come from my 12 years accountancy experience. I work well in fast-paced environments and under pressure.

I am now looking for new challenges at an organisation where personal development and career progression is a focus.
